Connected Solutions for
Better Traffic Safety Outcomes

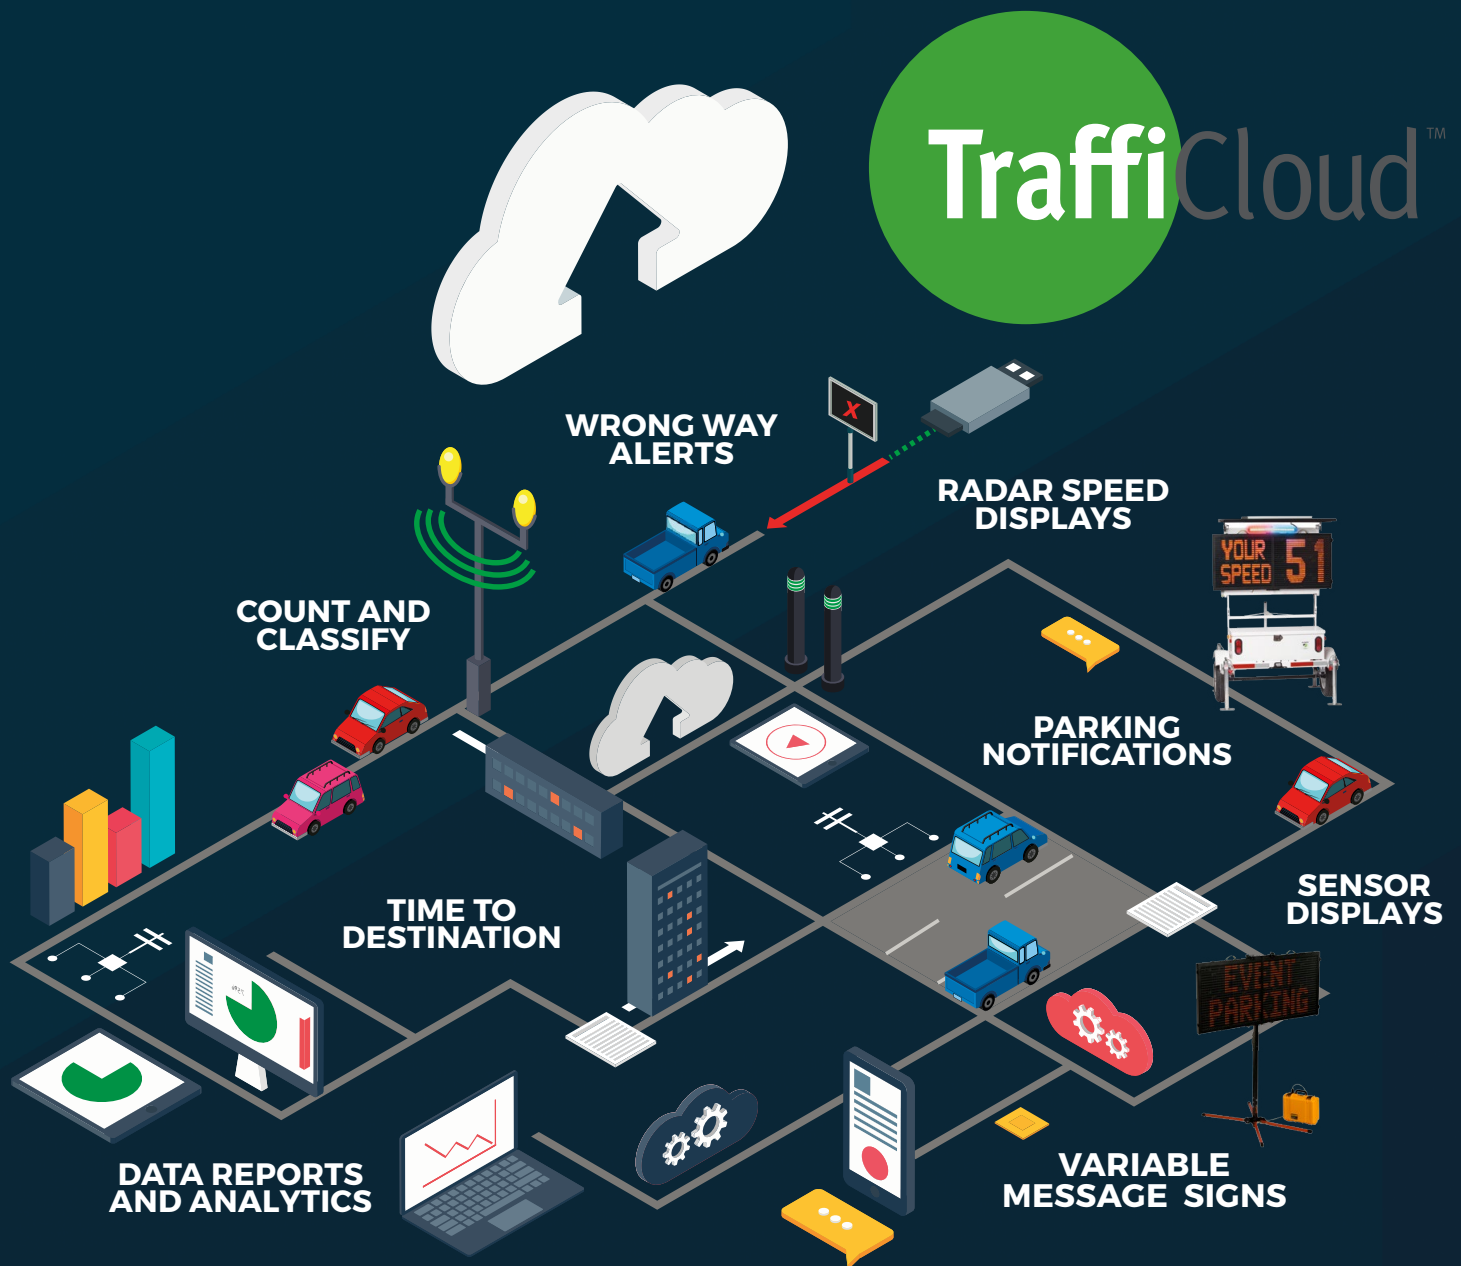

TRAFFICBRIDGE: VERSATILE CONNECTIVITY TO TRAFFICCLOUD

AllTrafficSolutions.com

The little box that will change the way cities, municipalities, communities and organizations everywhere manage their entire traffic programs forever

All Traffic Solutions delivers cloud-based traffic management solutions, including radar speed and variable message displays, imaging products and intelligent transportation systems for law enforcement, transportation and communities. Our innovative TraffiCloud™ traffic management platform is changing the way organizations solve their most complex traffic, transportation and parking challenges by allowing them to manage all their traffic equipment remotely, as well as leverage data to increase traffic safety, streamline their operations and achieve lasting results.

TrafficBridge™ is a customizable cellular gateway powered by a small box you attach to your traffic devices and sensors that lets you manage all your devices and data in TraffiCloud™.

Unleash the power of TraffiCloud across your entire traffic management program, consolidating your signs, radar displays, counter classifiers, parking equipment and more—regardless of manufacturer—on one flexible, extensible platform.

All your traffic devices and data in one consolidated cloud-based platform for total access and control in real time

- Connect all your traffic signs, devices and sensors, regardless of manufacturer, using an easy-to-install adapter that attaches to your existing equipment
- Reduce the time and complexity associated with managing your existing devices
- Get remote management, data analytics and conditional messaging for any sensor, data set or outbound messaging vehicle
- Create a holistic view of your entire traffic management system, accessible via one intuitive interface from any Internet-ready device

Get Total Connectivity with TrafficBridge

OPEN. FLEXIBLE. EXTENSIBLE. SCALABLE.

Build your traffic management ecosystem of the future without giving up the devices that work for you now. TrafficBridge does the work for you, connecting your devices, integrating your preferred vendor's equipment and consolidating your traffic data onto a single easy-to-use platform.

DATA ANALYTICS AND REPORTING

- Collect data from across your entire traffic infrastructure, understanding in real time how each component is performing
- Run reports for all your traffic initiatives
- Consolidate data from several or all devices to track location, spot trends, and identify problem areas and priorities that require attention

All Your Traffic Safety Program Data In One Place

TraffiCloud is our secure, web-based ecosystem for managing all your traffic safety data and equipment.

View dashboards and reports of all collected data. Make more insightful decisions based on data analytics from all your program components. Save time by managing the status of connected devices and dynamic messaging all from one central location. TraffiCloud functionality includes:

PREMIERCARE

Get a perpetual warranty and remote diagnostics for the duration of your subscription.

- 50% discount on accidental damage
- Real-time remote diagnostic monitoring

IMAGE MANAGEMENT

Achieve greater awareness with alarms or by requesting generated images.

- Capture images based on speeds, tampering, time intervals or upon request*
- Review, edit, print and act on useful images

REPORTING

Save time collecting, organizing, compiling and distributing information.

- Automated, daily uploads of new data into a centralized, SAS70-certified environment
- Identify trends to allocate resources and be proactive
- Schedule reports for regular delivery to your inbox

ENFORCEMENT

Automate the collection of Lidar captures.

- Ensure data accuracy
- Minimize data collection time

MAPPING

Manage your entire program through an intuitive visual interface.

- Interactive map provides a window to all system information

EQUIPMENT MANAGEMENT

Stop wasting time driving to equipment to update and monitor it.

- Check status and change settings from any Internet-connected device
- Send single message to multiple signs at once
- Respond immediately to changing situations

ALERTS

Specify when and whom to notify upon occurrence of certain conditions.

- Receive email or text as events happen
- Be aware of low batteries, high speeds, tampering, congestion and more

*Images can be used to identify vehicle make and color but are not ALPR quality.
