ParkingCloud Find

Guidance solution that directs parkers to spaces faster and more efficiently

ParkingCloud Find is a smart, user-friendly, easy-to-deploy wayfinding platform that gives you the ability to communicate parking availability to drivers based on live data for maximum optimization and control over your lots, garages and on-street parking.

1. **Push up-to-the-minute availability information** to variable message signs, your parking app or your website to direct drivers to convenient parking faster and more efficiently.
2. **Open platform** so you have near-limitless ability to integrate any kind of messaging platform with any type of device, removing the significant hurdle you could have with other solutions.
3. **Scalable, flexible** An ideal fit for existing facilities or new builds.

SPACE AND AISLE AVAILABILITY INDICATORS

- Display real-time occupancy and availability at the space level
- Leverage aisle indicators for a cost-effective yet powerful solution
- Combine sensors with your indicators for a more seamless installation that requires no cutting into infrastructure and reduces your installation costs

IN-APP AND WEBSITE AVAILABILITY

For additional convenience to parkers, push real-time availability data to your facility or campus application or even your website. Let parkers determine the most convenient parking space before they begin their journey, alleviating congestion along their route and increasing their satisfaction.

HEADS UP VARIABLE MESSAGE SIGNS

Improve customer satisfaction and mitigate risk by providing parkers with a heads-up driving experience. Flexible to adapt to any garage or lot configuration, our open platform can integrate with the widest variety of sign options. Because you manage your messages and your signs in the Cloud, you can broadcast availability at the space, level or zone—or across town, campus or facility.

Respond to events and other high congestion circumstances with message signs you can access and program from anywhere, providing timely guidance to drivers where they need it, when they need it.

Full-Matrix Color Signs:

- With flexible signage options, you can provide the widest variety of messages your drivers need for a safe, efficient, enjoyable parking experience
- Leverage full-matrix color signs to deliver up-to-the-second information about parking space availability
- Improve efficiency by displaying the time, number of spaces available—and when applicable—pricing

Outdoor Monitors:

- Brilliant messaging designed specifically for outdoor viewing
- Built to withstand any weather condition, including the brightest light, rain or snow
- The leader in readability, both up close and from a distance.
- Keep your messages crisp and visible, protected from the elements and elevated to safeguard against vandals.

Zone and Multi-level Availability Signage:

- Move parkers in and out of spaces faster by introducing multi-level and zone guidance.
- For congested areas and at peak times, ParkingCloud's heads-up guidance answers the question "Where is the closest parking?"
- Reduce circling and enable students, employees and others to arrive at their destination on time stress-free
- Display the number of available spaces on each deck or zone, updated in real time

Portable Signage:

- An innovator in portable sign technology, ATS has led the way in developing turnkey portable signs:
- Variable message signs that are mobile, lightweight and flexible in their deployment options
- Perfect for events and other critical episodic parking needs
- Ideal for keeping parkers moving in the most challenging circumstances

The ParkingCloud API

The ParkingCloud API helps you connect your parking data to other systems in real time. Create the parking availability ecosystem that meets your requirements so you can:

- Integrate with other availability systems and devices
- Output your availability data to any other system or device
- Integrate with notification or reservation systems
- Tie parking data in with your permitting solution

ParkingCloud's open API gives you the flexibility to build the customized parking system you need, fueled by real-time information and data

FLEXIBLE

Our open platform allows you to integrate to create the best solution to meet your needs

EXTENSIBLE

Scalable solutions to meet your needs today and into the future

OPEN

Open-platform approach for maximum use across devices and systems

DEVICE-AGNOSTIC

Don't get locked into one technology. With ATS, you can have them all

COMPREHENSIVE

With our open platform, you can have an end-to-end solution that meets all your needs

ACCURATE

With ParkingCloud, you can achieve upwards of 99% accuracy

CUSTOMER FOCUSED

We don't just partner with our customer's, we're on your team

COST-EFFECTIVE

Open platform delivers the solution that meets your needs and your price point

MISSION DRIVEN

We're 100% focused on your goals, making parking easier and better for everyone

ParkingCloud is the only cloud-based IoT platform purpose-built for the parking, traffic and transportation industries that integrates all your devices, data and output in one place.

With ParkingCloud, your technology choices are limitless, independent of your current environment—as complex or as simple as you need them to be. Leverage your existing technology and, at the same time, seamlessly future-proof your ability to add new technologies as they are developed or as your requirements change—without being locked into one vendor’s platform.

DEVICE-AGNOSTIC

Connect any device from any manufacturer

CONNECTED

Integrated devices, data, reporting and instructions from any location, anytime

SINGLE DATA PLATFORM

Access data from any source in one system

SIMPLIFIED

Everything in one location, accessible from one dashboard

ParkingCloud API

The ParkingCloud API helps you connect your parking data to other systems in real time.

Create the parking availability ecosystem that meets your requirements so you can:

- ✔ Integrate with other availability systems and devices
- ✔ Output your availability data to any other system or device
- ✔ Integrate with notification or reservation systems
- ✔ Tie parking data in with your permitting solution

ParkingCloud’s open API gives you the flexibility to build the customized parking system you need, fueled by real-time information and data.
