

# PARKINGCLOUD NOW™

The world's easiest, most accurate parking counting system

Parking counting, signage and real-time availability data and reports. *(...did we mention >98% accuracy levels?)*

**Be up and running in hours, not months**—count vehicles at entrances, exits and other defined parking areas and share availability on digital signage, apps or web.

- Garage or open lot
- No delimiters – fully bidirectional
- Side or overhead mount
- Differentiates people, bicycles and tailgating vehicles

You get:

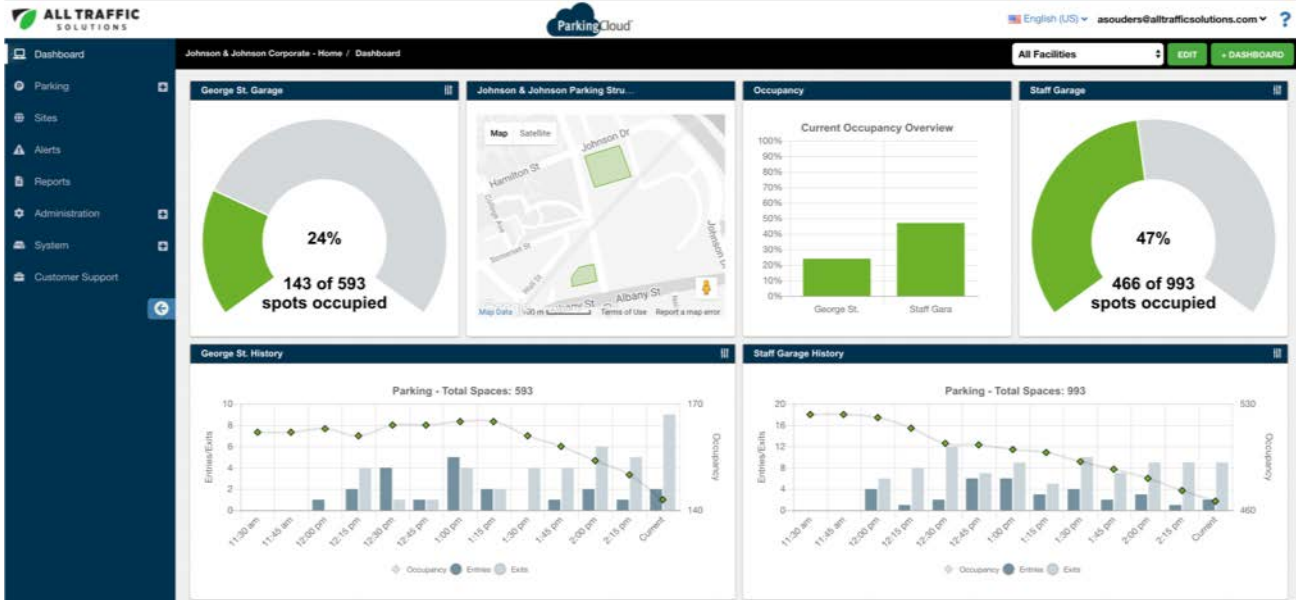

- Two ParkTrak-E counting devices
- Digital LED SPACES AVAILABLE sign
- ParkingCloud Mobile app
- ParkingCloud integration for single-dashboard viewing and reporting

## Simple installation and configuration

One-button range detection for overall installations  
Thresholds for minimum and maximum vehicle detection time  
LEDs and audible indicators tell you when vehicles are being counted during installation  
Built-in camera for advanced analytics and configuration  
Fully turnkey—just add power  
Start with one and expand to your entire facility

**ALL TRAFFIC SOLUTIONS**

## DIGITAL LED SIGNAGE

## PARKINGCLOUD NOW MOBILE APP

Sign can display numeric values as well as OPEN, FULL, and CLSD with super-bright wide viewing angle LEDs.

Features long-life and very low energy and maintenance requirements.

Guaranteed readability in direct sunlight. Blanks out when off.

A solid-state circuit board and integrated power supply are enclosed in a mitered extruded aluminum housing. UL/CUL Listed.
