MADE IN THE USA

MOBILE TRAILER FOR RAPID DEPLOYMENT OF SURVEILLANCE CAMERAS

*Perfect for use at **special events** and quickly changing areas of interest.*

This surveillance-ready trailer is a portable, plug-and-play solution that gives you the power to easily deploy and move surveillance cameras at a moment's notice.

PORTABLE 22' TELESCOPING MAST

The trailer features a detachable surveillance-ready telescoping mast that can compact down to conveniently fit in the trunk of a car. It fully extends in just 30 seconds with the help of an easy-to-use, hand-operated pneumatic lift. Once attached to the trailer's receiver hitch, the mast reaches a height of 22 feet— perfect for serving as a portable surveillance tower.

FLEXIBLE COMPATIBILITY

The mast's adaptable design is compatible with many different surveillance cameras, giving you the freedom to choose your preferred brand.*

UNMATCHED MOBILITY

Trailers feature a simple manual lever with a lift-assist system for quick 1-person setup. No special equipment is needed to transport them— they can be towed by any size vehicle with a 2" receiver hitch.

MULTIPURPOSE & VERSATILE

Trailers are equipped with an InstAlert variable message sign or SpeedAlert radar message sign— so you can simultaneously direct traffic, improve pedestrian safety, and share information to manage crowds and help events run smoothly.

BATTERY & TAMPER ALERTS

Get alerted** via text message or email when a trailer's sign is tampered with or when its power runs low.

Surveillance-ready trailer with mast attached

Detachable mast compacts down and all components fit in the trunk of a car

*Cameras must be purchased separately from a vendor of the customer's choosing

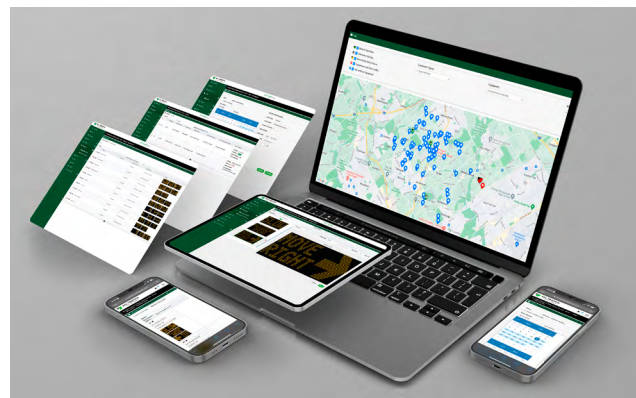

**TraffiCloud® subscription required

REMOTE SIGN MANAGEMENT

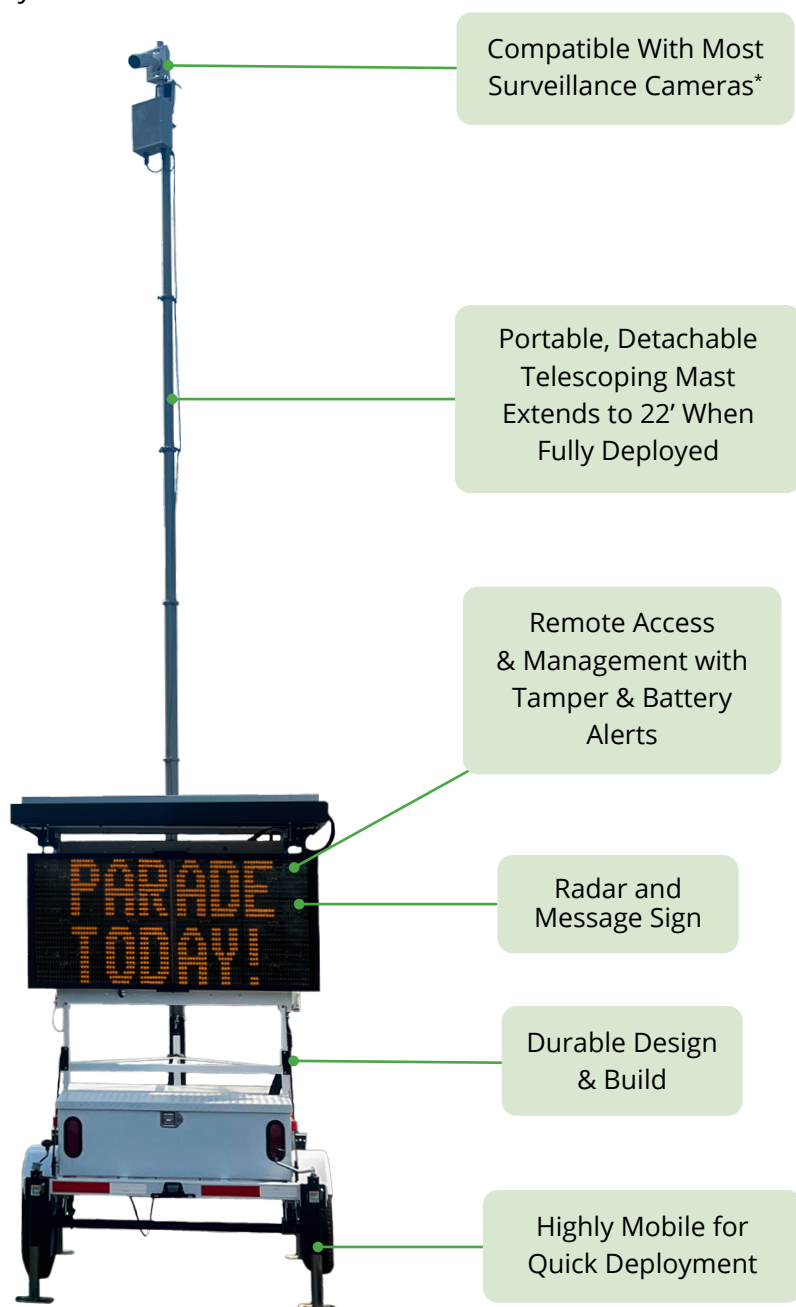

The trailer's sign connects to our online TrafficCloud® portal, so you can conveniently manage and monitor its power status, location, display settings, and more 100% remotely. Save time while ensuring that your equipment* is functioning exactly as you need it to at all times.

RUGGED AND BUILT TO LAST

The continuous weld steel frame and marine-grade powder coat finish withstands heavy rain, snow, ice, and extreme temperatures without rusting. Most ATS trailers are still in use after 10 or 15 years of year-round use!

Manage signs remotely with TrafficCloud®
